

AMENDMENTS TO THE CLAIMS:

The listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (original) A method of printing an event ticket comprising the steps of:

purchasing a plurality of tickets across a computer network; and

printing the plurality of tickets using a desktop printer onto a media having a plurality of ticket printing areas each defined on at least one edge by a line of weakness, the plurality of ticket printing areas configured to allow tickets of different sizes and for different events to be printed on the media.
2. (original) The method of claim 1, wherein purchasing a ticket across a computer network includes:

providing ticket selection information across the network from a computer; and

transmitting ticket printing information across the network to the computer.
3. (original) The method of claim 1, wherein the step of printing the ticket includes printing a unique identifier on the media to authenticate the ticket.
4. (original) The method of claim 3, wherein the unique identifier is at least one of a bar code, alphanumeric printed text or a glyph.
5. (original) The method of claim 1, wherein the desktop printer is attached to a personal computer that is a client in a client-server network.
6. (original) The method of claim 1, wherein each of the plurality of ticket printing areas includes a removable ticket stub area.

7. (original) The method of claim 6, further comprising the step of printing a ticket stub onto the removable ticket stub area.
8. (original) The method of claim 1, further comprising printing directions on the media.
9. (original) The method of claim 1, further comprising printing at least one concession coupon onto an additional removable portion of the media.
10. (original) The method of claim 1, further comprising printing indicia onto a removable label positioned on said media.
11. (original) The method of claim 1, wherein the media includes a card area having at least one printing surface and a lamination member attached to the media and adapted to laminate the card area, the method further comprising printing onto the card area.
12. (original) The method of claim 1, further comprising printing a parking pass onto a removable portion of the media.

Claims 13-63 (canceled).

64. (original) A method of printing a gift certificate on a desktop printer, comprising:

purchasing a gift certificate across a computer network; and

printing the gift certificate using a desktop printer, wherein printing the gift certificate on a desktop printer comprises printing the gift certificate onto a media having a certificate printing area defined on at least one edge by a line of weakness.

65. (original) The method of claim 64, wherein purchasing a gift certificate across a computer network includes:

providing gift certificate selection information across the network from a computer; and

transmitting gift certificate printing information across the network to the computer.

66. (original) The method of claim 64, wherein printing the gift certificate includes printing a unique identifier on the media to authenticate the gift certificate.

67. (original) The method of claim 66, wherein the unique identifier is one of the group constituting: a bar code, alphanumeric printed text, and a glyph.

68. (original) The method of claim 64, wherein said desktop printer is attached to a personal computer that is a client in a client-server network.

69. (canceled)

70. (original) The method of claim 64, further comprising printing a personalized message on a portion of the media.

71. (original) The method of claim 64, wherein the media includes a removable card area having a fold line and the method includes printing onto the card area.

72. (original) The method of claim 64, wherein the media includes a removable envelope seal.

73. (canceled)

74. (original) A method of printing a certificate purchased online, comprising:
purchasing at least one certificate across a computer network; and

printing the certificate using a desktop printer, wherein printing the ticket on a desktop printer comprises printing the certificate onto a media sheet having a plurality of separate printing areas separated by lines of weakness.

75. (original) The method of claim 74, wherein the plurality of separate printing areas includes equally-sized printing areas separated into rows and columns by lines of weakness.

76. (original) The method of claim 75, wherein the separate printing areas are no larger than one inch by one inch.

77. (canceled)

78. (currently amended) The method of claim 74, wherein said certificate is one or more of the group constituting a ticket, directions, a food coupon, a parking pass, [[and]] a merchandise coupon, and a gift certificate.

79. (original) The method of claim 74, further comprising:

loading a supply of media sheets each comprising a plurality of separate printing areas separated into rows and columns by lines of weakness;

printing a first document onto a first media sheet, in which said first document is printed onto particular rows and columns of said first media sheet; and

printing a second document onto a second media sheet, in which said second document is printed onto particular rows and columns of said second media sheet, said printed rows and columns of said second media sheet being different than said printed rows and columns of said first media sheet.

Claims 80-96 (canceled).
